

Job Opportunity: AutoCAD & Building Information Modeling (BIM) Designer

US Communications and Electric, Inc.

www.uscande.com

Posted: November 7, 2012

US Communications seeks a qualified AutoCAD and BIM professional to join our team. This is a full-time position but part-time and/or flexible hours will be considered for exceptional candidates. Salary and benefits are commensurate to experience.

Successful candidates will possess many of the following skills and characteristics:

- Working knowledge of the latest building and construction software programs. These include AutoCAD (two dimensional and three dimensional,) Building Information Modeling (BIM,) and Adobe.
- The ability to download, review, modify, and create blueprints using AutoCAD, Adobe, and BIM software programs. This will also include turning customer-provided drawings into "as built."
- Comfort in preparing and discussing blueprints with project managers, job foreman, and company leadership.
- Has the time management skills necessary to prioritize and manage multiple projects that may begin and end on similar schedules.
- As needed, fill in for project managers and sales representatives on site surveys and/or assist with material take offs. The identification of cabling problem areas on site surveys is important.
- General knowledge of the construction trade. Specific understanding of the communications trade is preferred but can be further taught internally.
- Interested in maintaining technical knowledge by attending educational workshops and reviewing technical publications.
- Complete familiarity with Microsoft Office software programs (Word, Excel, Outlook, etc.)
- Is a "team player."

Interested job candidates should forward a cover letter and resume to Bob Aber (bob.aber@uscande.com) by December 1, 2012. References may be requested for candidates as the process progresses.

About US Communications and Electric, Inc.

Founded in 1996, US Communications and Electric, Inc. excels in the design, installation, and maintenance of technology infrastructure solutions.

Offering a unique mix of design engineers, installation technicians, and office support, US Communications provides a wide array of ideas and solutions to meet the demanding challenges of the communications cabling market. We offer expert solutions in fiber cabling systems, campus backbone systems, and horizontal copper cabling solutions that support desktop data, voice, audio/visual, and security solutions. Clients range from small businesses, to k-12 school districts, to large corporate headquarters, to complete entertainment and healthcare campuses.

US Communications is an equal opportunity employer and operates throughout Ohio from our headquarters in Garfield Heights, Ohio.
